

# THE ALL NEW POWER-TILT 300 + 400 RANGE OF DUMP TRAILERS

**This range features NC's new advanced tail door system, now known as the no hassle or magic tail-door'**

it's simply magic

The New power-tilt range can be used with or without tail-door, the door is always there **'But never in your way!'**. When the door is required just flick a lever and the door will appear.

Once again computer aided design has played its part, ensuring they are easy to tow and a pleasure to load. Priority has also been given to operator comfort, public safety and finally a safe clean environment.

Constructed of the best quality steel plate to stand up to the rigours of constant loading and unloading the 8mm thick floor is well and truly supported by optimum spacing of floor runners. Even the side panels are extra thick steel and supported by two massive continuous horizontal and bulge supports.

**NC Trailers built to be in front – mostly seen from behind!**

The careful positioning of the body pivot point ensures a maximum height of discharge, enabling the operator to stock pile top soil, or whatever with the minimum of ease. The NC Dump Trailer is designed wider and lower for better stability, hence making it easier to load with a rubber tyred or mini track digger, also the body can be scraped clean using a 6ft or 1.83m bucket.

Just tip her up and it disappears

### **Remember . . .**

With our **magic** taildoor you **never** have to put it on or take it off. There is **no** load too awkward. Bushes, trees, roots, etc. Just tip her up and it disappears.

**Where Quality Comes First!**

**THE ALL NEW POWER-TILT  
300 + 400 RANGE OF  
DUMP TRAILERS**

**Sprung Drawbar**

**Pleasure to load with small digger  
"Now You See It"**

**Magic tail-door system  
"Now You Don't"**

Note: the carrying capacity as stated is the weight the trailer is capable of carrying. The actual weight carried will depend on the density of the material and may be more, or in some cases less, than the rated weight.

	8 ton	10 ton	12 ton	14 Ton	16 Ton	18 Ton	20 Ton
Overall Height	1.93m	1.93m	2.03m	2.10m	2.22m	2.24m	2.34m
Body Length	3.73m	3.73m	4.00m	4.14m	4.16m	4.56m	4.56m
Overall Length	5.10m	5.10m	5.40m	5.54m	5.54m	5.94m	5.94m
Height from floor to top of side	0.67m	0.67m	0.74m	0.82m	0.92m	0.92m	1.02m

Inside Body width at top of side	2.06m	2.06m	2.26m	2.28m	2.32m	2.32m	2.36m
Overall Body Width	2.23m	2.23m	2.43m	2.45m	2.52m	2.52m	2.56m
Wheel track	2.39m	2.39m	2.46m	2.46m	2.46m	2.49m	2.49m
Number of Axles	1	2	2	2	2	2	2
Floor Runners: 80 x 40 x 4 Hollow Section							
Floor Thickness: 8mm as standard 10-12mm optional							
Side Thickness 5mm as standard 8mm optional							

**Easily scraped out with wide bucket**

**The NEW 400 Series Dump Trailers** are the most compact and versatile trailers on the market today.

They have a **magic** door at both ends and can carry everything from clay to small or medium sized diggers etc.

Just lower down the front door and ramps **from the tractor seat**, load on your small track machine, hook on your tractor and you are away.

One operator taking three machines to one job. Making this a massive saving.

**This multi-purpose trailer is a must when it comes down to saving time, saving space, and of course money.**

**Try one and see**
